The world-beating Gravity Range

[instagram.com/conti_mtb](https://www.instagram.com/conti_mtb)

KRYPTOTAL Fr

WORLD CHAMPIONSHIP WINNING TYRE IN 2023!

Our Kryptotal tyres are the all-rounders of our Gravity range. Stability, grip, traction and superior rolling resistance. Ideal for those mixed terrain conditions for you to push your limits in trail, enduro or downhill gravity riding.

Kryptotal front: better performance for front-wheel specific demands like track stability & agility. Steep and shallow ramps tailored to the area of application in mixed and loose terrain. **Benefit:** balance between harmonious, easy rolling and power transmission.

-  SuperSoft: 100% focus on grip, traction and control - the softest and grippiest compound in the MTB Gravity range. Ideal for Downhill and Enduro where the main focus is descending.
-  Soft: The balance of grip and rolling resistance for gravity focussed riders. High level of grip with a reasonable rolling resistance. Option to optimize the rolling properties of your rear wheel on the DH bike or have the optimal combo for Enduro or Trail riding.
-  Endurance: Compound with balanced properties on grip and endurance. High durability in combination with good rolling resistance and grip is achieved. The choice for trail riding or as an endurance focused compound for e-Bikes.

Charlie Hatton claimed gold at the men's 2023 UCI World Downhill Championships in Fort William, whilst Vali Hoell did likewise in the women's race! Speaking about the development of the tyre which involved extensive collaboration with the Continental-Atherton Bikes team, Continental's Oliver Anuth explains:

"Charlie and Andi, alongside Rachel, Dan and Gee have collaborated with Continental for 5 years now, and it's thanks to their ongoing feedback and expertise that we've been able to make a product that can help racers on the way to the podium at the highest level of the sport, and that everyday riders can experience too."

KRYPTOTAL Re

WORLD CHAMPIONSHIP WINNING TYRE IN 2023!

Developed and tested by the Continental-Atherton athletes at Dyfi Bike Park (Machynlleth, Wales), the Gravity range has been proven to excel in particularly rough and loose conditions.

Kryptotal rear: pattern design especially tailored for rear wheel use. **Benefit:** best performance in braking, traction and track stability. Balance of positive profile and open areas designed for best performance in complex terrains. **Benefit:** sweet spot between grip, self-cleaning, adaptivity and rolling characteristics. The use of steep and shallow ramps are tailored to the area of application in mixed and loose terrain. **Benefit:** balance between harmonious, easy rolling and power transmission

Supersoft, Soft & Endurance compound options, across DH, Enduro & Trail casings.

ARGOTAL

ENGINEERED FOR LOOSE CONDITIONS

The ideal tyre for loose terrain given its incredible cornering stability and enhanced side-grip. Open tread pattern design for perfect interaction on loose surfaces. **Benefit:** good self-cleaning in moist and wet conditions.

The pronounced studs are equipped with steep ramps in order to generate mechanical grip through a pattern-soil interaction. **Benefit:** expectational grip in loose and mixed surfaces.

Downhill Casing: Two Ply (4-6-4) carcass. 110 TPI Apex Tubeless-Ready. **Application:** Downhill, Freeride, Super Enduro & heavy Enduro. **Bikes:** Fullys -> 170-200mm suspension travel. Conventional and e-Bikes

Enduro Casing. Durable single ply (2-3-2) carcass construction with Apex to prevent snakebites. 110 TPI Apex PT cross-woven sideall layer. Tubeless-Ready. **Application:** Enduro and heavy Trail. **Bikes:** Fullys -> 150-170mm suspension travel. Conventional & e-Bikes

Trail Casing Comparable performance to the Enduro casing tailored for trail use. Single ply carcass (2-3-2) 60 TPI. PT cross-woven sideall layer. Tubeless-Ready. **Application:** Tour and Trail Bikes. **Bikes:** Fullys -> 140-160mm suspension travel. Conventional and e-Bikes

"The Argotal is like nothing we've had in our range before and I think its going to be a staple tyre in any slightly soft riding conditions weather its wet or dry..honestly a game changer for us!" - Continental-Nukeproof Test Rider

XYNOTAL

CONTROL OVER ROCK AND HARDBACK TERRAIN

Perfect for hardpack, rocky surfaces. With low rolling resistance and defined contact edges for improved traction and braking, you can go full gas knowing you'll have consistent grip right when you need it the most.

Angled in-line shoulder studs for predictable and indulgent transitions. **Benefit:** high limit range can be reached predictably and safely

Pronounced positive profile with a large number of contact areas. **Benefit:** harmonious riding behavior and high grip on hard and slightly loose surfaces.

Pronounced ramps in the direction of rotation ensure harmonious and easy rolling. **Benefit:** low rolling resistance and improved grip on hard surfaces.

Available in 8 formats to suit Downhill, Enduro and Trail riders.

HYDROTAL DOMINATES THE WET AND MUD

Our specialist Downhill Mud option, available in a race-ready super-soft compound. Hydrotal balances grip and rolling resistance and features a self-cleaning tread to ensure consistent grip when you're shredding through the gloopy, slippery sections.

Tapered and supported knob elements are designed to ease the interaction between stud and soil.

Benefit: high mechanical grip and superb self-cleaning properties

Open pattern design for perfect interaction on loose surfaces

Benefit: superb pattern-soil interaction and self-cleaning

Support structure and in-line shoulder studs

Benefit: high stability when cornering aggressively in loose and muddy soils

Downhill Casing: Two Ply (4-6-4) carcass. 110 TPI Apex Tubeless-Ready. **Application:** Downhill, Freeride, Super Enduro & heavy Enduro. **Bikes:** Fulllys -> 170-200mm suspension travel. Conventional and e-Bikes

SuperSoft: 100% focus on grip, traction and control - the softest and grippiest compound in the MTB Gravity range. Ideal for Downhill and Enduro where the main focus is descending.

The HYDROTAL is tubeless-ready, featuring a folding bead and is E-rated to 25kph. .

MOUNTAIN KING HERO ON THE MOUNTAIN: THE PERFECT TRAIL COMPANION

A great 'do-it-all' choice for all year trail use, ideal for full-suspension trail bikes.

As with all Continental MTB tubeless-ready casings, the Mountain King seats and inflates with ease. Middle lugs are angled for acceleration and speed, deep seated outer lugs take care of stability.

Designed alongside the adidas CMTK trail running shoe due to the close cooperation between adidas and Continental

RACE KING

THE XC RACERS FIRST CHOICE

Always the best choice when race-day trails are dry. The Race King feels just as at home at the Cross Country World Cup as it does at Ultra-Marathons. A voluminous carcass gives great self damping qualities whilst the the low rolling tread pattern keeps the speed up through the turns and through to the straights. Also popular with jump bikers.

ROAD

[instagram.com/conti_road](https://www.instagram.com/conti_road)

Grand Prix 5000 S TR

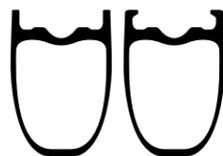

MARKET LEADING TUBELESS-READY ALL ROUNDER

Lighter, faster and with stronger sidewalls. The new standard in road tubeless ready technology. Ride faster, more comfortable and with increased puncture protection. Made to make you better.

The GP5000S TR has been the winning tyre at both the men's Paris-Roubaix and World Time Trial Championships, showing its versatility across these very different races with their very different demands on equipment. The GP5000S TR covers them all!

For initial mounting we recommend to use at least 30 ml of Conti RevoSealant per tyre. Then spin the wheel to spread the Conti RevoSealant inside of the tyre and pump to the allowed maximum pressure. Check the pressure before the next ride and adjust to your desired PSI.

E50

Grand Prix

THE ORIGINAL RACING CLASSIC

The name 'Grand Prix' has become a brand of its own in cycling circles worldwide. This is the tyre from which the famous GP5000 originated.

The Grand Prix now sits below the GP5000 in the Continental road tyre range, at a different price point, offering a 180tpi casing, Poly-X anti-puncture technology and a BlackChili compound.

All of these components ensure that cyclists using the Grand Prix can be sure of race proven technology, made in Germany.

Grand Prix 4-Season

THE ALL-YEAR-ROUND TYRE AND A RELIABLE COMPANION FOR THOSE HIGH MILEAGE ROAD CYCLISTS

Reliable companion for training rides and in competition, come rain or shine. The tyre with a superior durability ready for any season. With DuraSkin® sidewall reinforcement.

- Styled on the GP4000 S II, but with extra protection layers for harsh weather conditions
- Duraskin® cut-resistant layer from bead to bead plus 2 extra Vectran breakers
- Black "Max Grip Silica" compound optimised for wet weather adhesion, low temperatures and extended tread life.
- The toughest performance clincher on the market.

Gatorskin

RIDE HOW AND WHERE YOU WANT

The most well-known road bicycle tyre. Durable, fast yet tough at a really nice price. The Duraskin® external mesh forms a protective shield over the entire casing to help prevent cuts, punctures and abrasions. The slick German made natural rubber tread is designed to perform well in wet/wintery conditions.

Intended for high mileage serious cyclists in a host of sizes.

Gator Hardshell

MORE DURABLE FOR FIXIES & MESSENGERS

Ideal when it comes to extremely long service life, for the extra urban demands of high-use machines .
MORE casing; MORE anti-puncture breaker material; MORE protection...

Taking the Gatorskin as our base, we've added a third Polyamide layer in the sidewall to make a unique 3-ply casing for the Gator Hardshell.

We've also added a wider Poly-X anti puncture breaker belt under the tread which extends down into the shoulder area for wider coverage..

Hometrainer II

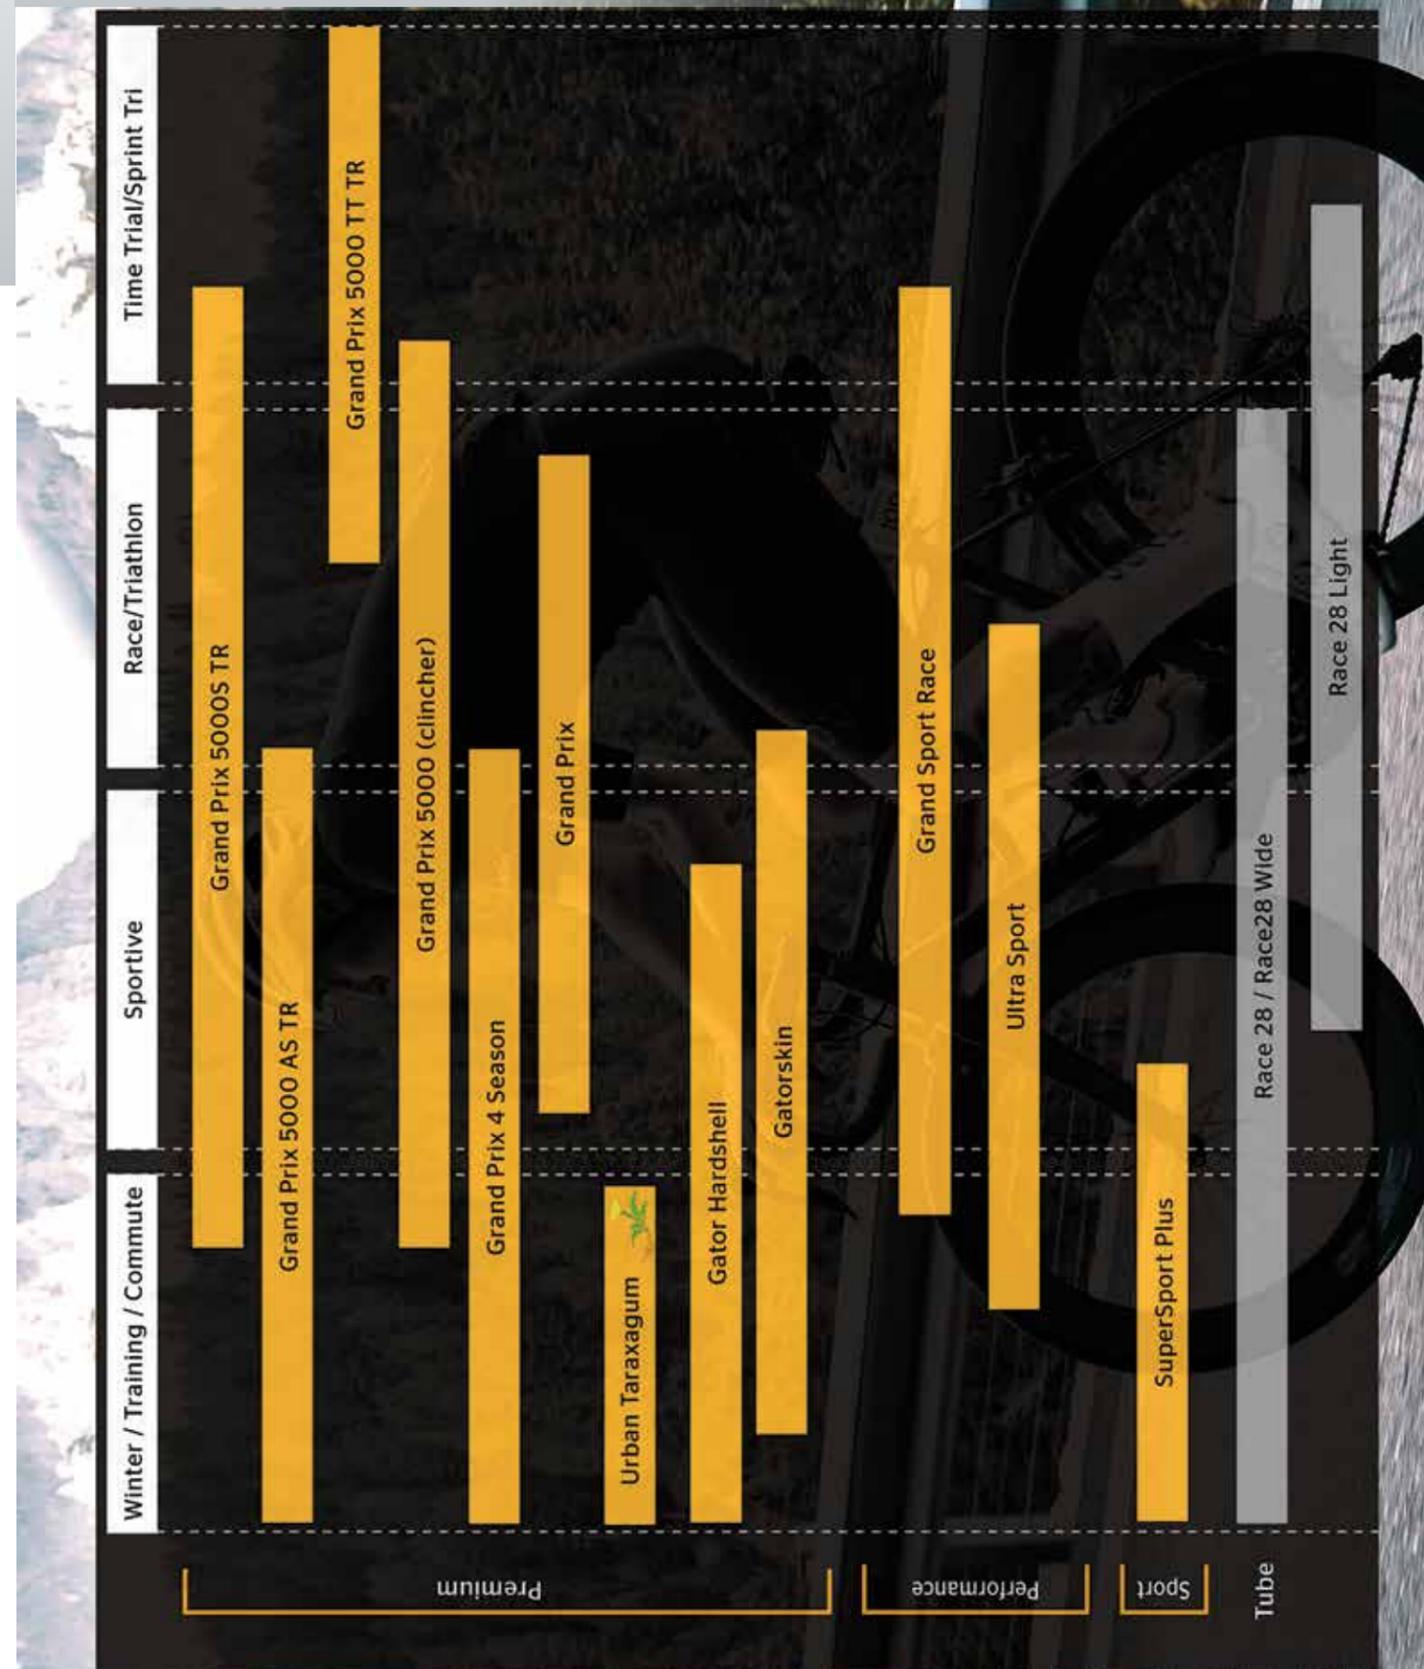

THE KILOMETRE ACCUMULATOR ON THE ROLLERS

Developed for the essential basic training at home. Particularly smooth running. The durable cold-running compound stops heat build up. Keep a spare rear wheel and fit the Hometrainer tyre to save your regular tyre from excess wear.

! Suitable for training on rollers/home trainers only.

URBAN TOUR

Specifically designed for the use on electrified bikes

eCONTACT Plus THE ULTIMATE IN CONFIDENCE AND COMFORT

The eCONTACT Plus is a tyre specifically developed for the commuting and load-carrying demands of e-bikes. Equipped with E50 certification, durability and puncture protection are enhanced to resist the stresses from increased torque and acceleration.

This high-mileage tyre features a compact tread pattern to keep rolling resistance low, boosting the range of each battery charge.

Not only is the eCONTACT Plus strengthened against small objects such as glass and thorns, but thanks to the unique tread and advancement of the Continental construction technologies, it also boasts better protection from nails and larger hazards.

SAFETY LEVEL 

instagram.com/conti_urban

CONTACT Plus TOUGHEST YET LIGHTEST PLUS TYRE ON THE MARKET

Up to 30% better protection* Our toughest commuter & leisure tyre for standard bikes, rental bikes & e-bikes. An all-rounder for all types of road & path surfaces.

- SafetyPlus construction - developed for e-bikes up to 50km/h. Extremely resistant to cuts and piercing
- Safety Plus - surprisingly fast rolling thanks to a flexible 180 threads per inch nylon casing
- Built to handle rapid acceleration and high cornering speeds

ECE-R75-certified, designated for usage on e-bikes up to 50km/h.

* Benchmark Test CONTACT Plus

In the course of the development of the new CONTACT Plus, a total of nine tyres has been compared with a competitor's tyre model in a susceptibility to piercing (blade) test. The benchmark test results by the Zedler Institute underlined that the CONTACT Plus would perform „distinctly more resistant“ against the damages by pieces of glass and comparable items than the competitor's tyre.

To find out more about the Contact Plus Puncture Resistance Test scan the QR code.

PUNCTURE PROTECTION 

CONTACT Speed

UNITES SPEED AND COMFORT IN ONE TYRE

The perfect choice for the city speedsters, single-speed bikes and fitness bikes. With its double layer of fabric breaker, the light-weight design and its roughened slick tread it shines especially on tarmac.

The CONTACT Speed also features a 'skinwall' sidewall. Most city/trekking tyres use a gumwall meaning lots of rubber in the sidewall to improve sidewall puncture resistance. A skinwall sidewall is much faster than a gumwall but just a little forward thinking is needed to avoid scuffing kerbs and to always maintain the minimum recommended tyre pressure.

"Micro-diamond" tread pattern rolls fast yet grips on loose debris covering road surfaces like grit, gravel or mud. Reflective sidewalls are an option on some sizes for added safety and the CONTACT Speed is able to be used with dynamo lights.

Super Sport Plus

MESSENGERS, HARDCORE COMMUTERS AND FIXIE RIDERS

The Supersport pedigree is long standing in the Continental range, as a model delivering long mileage and amazing puncture resistance.

Borrowing a proven tread pattern from the venerable Grand Prix, the Supersport PLUS now features our Plus breaker belt, a thick elastomer layer beneath the tread to provide superior puncture protection

Robust, extra thick casing rubber provides extra sidewall durability, whilst added material in the tread strip defines tread life like no other.

Messengers, hardcore commuters and fixie riders - your tyre has arrived!

- When avoiding punctures is the sole requirement
- Soft elastomer ,PLUS' belt under tread
- Thorns, glass and other debris are pushed away rather than penetrating through

Grand Prix Urban THE STATEMENT TYRE FOR THE CITY

Combines a modern tread pattern design with the latest technology. Built with a tuned race construction while damping for comfort - a matching mix for the urban ride. Its black reflective stripe blends perfectly with the sidewall.

Does not meet the certification standard ECE-R88. Does not support reflective properties as per StVZO (Germany).

RIDE Tour INEXPENSIVE, LONG LASTING, PUNCTURE RESISTANT

The RIDE Tour offers everything a real all-round tyre needs. A tread for every intended surface, the obligatory breakdown protection belt and a high mileage compound ensure the RIDE Tour is a trusted companion on your regular rides. Available in a very wide range of sizes making it an ideal workshop tyre for bike shops to service a variety of different bicycle types.

Features an upgraded 180 threads per inch casing rather than the previous 66tpi. This means that the tyre casing is more supple. This gives both better rolling resistance (a faster ride for the given rider power input) and better puncture protection as the tyre is able to deform more quickly around sharp offending objects.

- City / street tyre for a diverse range of fitments
- 3mm thick EXTRA puncture belt under the tread
- Inexpensive & long lasting

SAFETY LEVEL

RIDE City

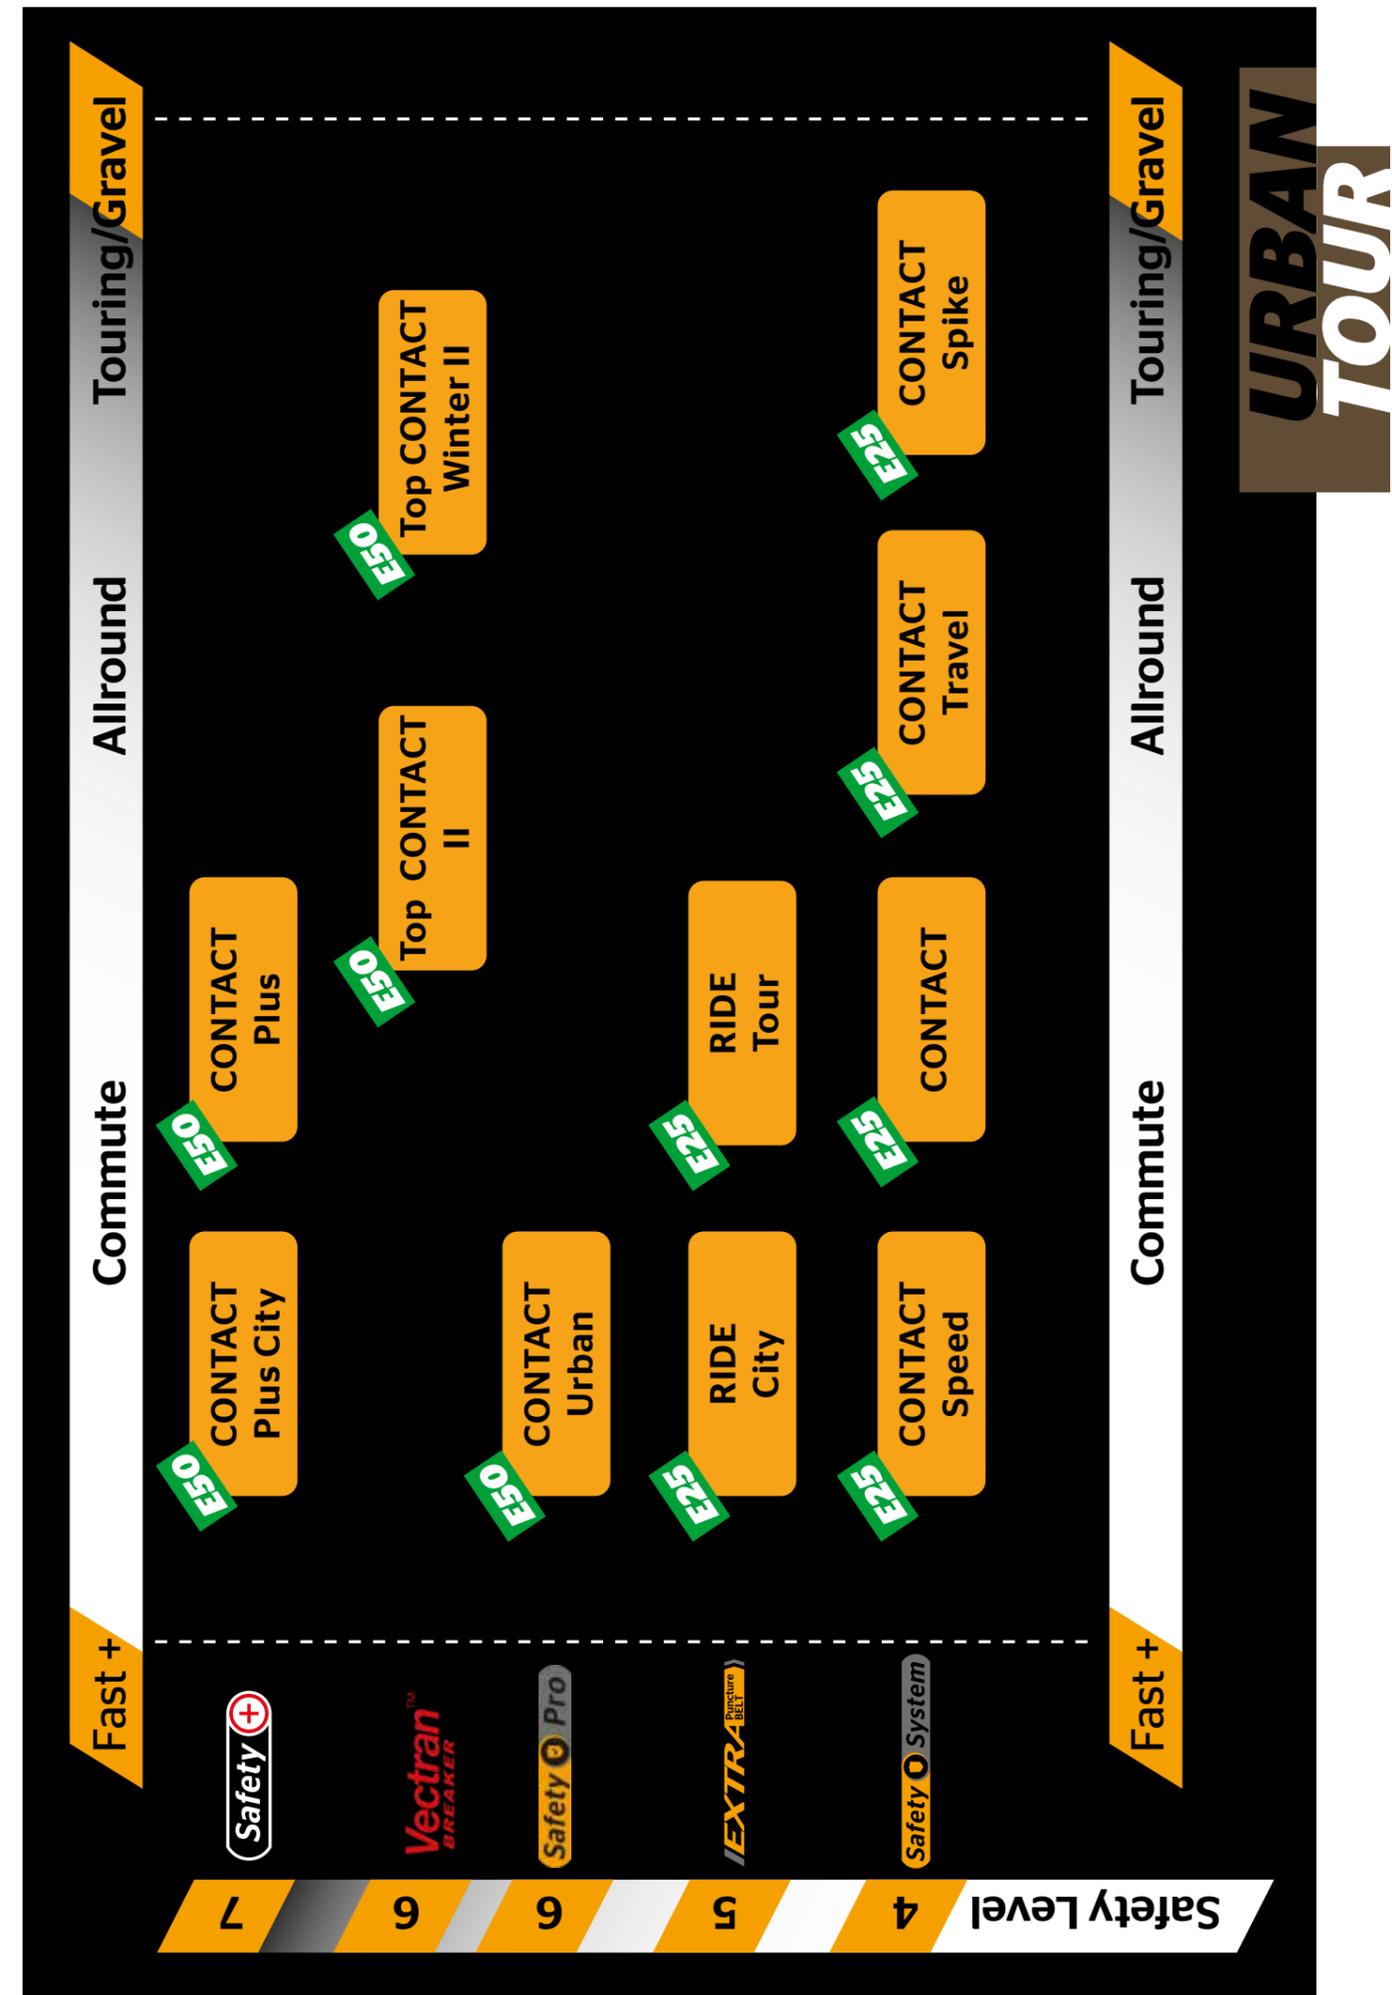

A ROBUST TYRE WITH A MODERN LOOK

Comfortable and safe cycling in the city with the RIDE City for pure cycling enjoyment. Its reworked profile design provides an even larger contact area on asphalt and low rolling resistance. The EXTRA puncture protection belt helps prevent unnecessary delays on the way to work or from the shopping trip.

- Reliable & economic city tyre with a new look practical tread pattern
- Suited to everyday cyclists who require reliability on a budget
- Sizes to fit MTB & 700c bikes

TUBULAR

Competition

IT'S TIME TO RACE:

THE CLASSIC FOR STRONG ACCELERATION

Robust all-rounder appearing at the sharp end in all the major cycling races around the world. Agile and fast, adapts to the competition in all road conditions.

In recent times, Egan Bernal, Geraint Thomas & Chris Froome have won Tours de France on Continental Competition tubulars. Add these wins to countless victories at the IronMan World Championships in Kona, and you can see that it provides the best combination of speed, grip and reliability at the top end of our sport for those riders using the tubular wheel system.

- Handmade in Germany!
- Winning tyre at three Paris-Roubaix races
- BlackChili compound
- 4 layers of puncture protection under the tread
- Vectran protection.

NEW

Competition TT

EVEN FASTER

Even faster time trial tire due to the delicate carcass. Excellent acceleration thanks to the application of a latex tube. Design updated to a smooth central tread pattern.

Dedicated 25mm TT / Triathlon tubular, based on the legendary Competition road tubular.

An ideal choice for those riders using a tubular wheel system for individual events, from the IronMan World Championships in Kona to the local evening time trial, combining the proven reliability of our Competition road tubular yet adding extra speed through a more supple tyre casing, smooth central tread pattern, lower overall weight and a latex tube. Latex inner tubes are proven as the fastest tube material, with a lower rolling coefficient than butyl.

- Handmade in Germany!
- Only 190g. 50g lighter than the Competition tubular
- Featuring a latex tube
- Smooth centre tread
- Finer casing
- Accelerates faster and rolls quicker!

Please consider the special attributes of latex tubes!

Sprinter

FAST SPRINTER, FOR WINNING THE POINTS

Its function is in its name. The Sprinter is a fast tyre for the shorter road events like criteriums.

With a nylon SafetySystem puncture protection breaker it is reliable without losing its terrific rolling qualities. Its flexible casing and the anti-skidding rubber mixture keeps the contact even in fast 90 degree bends.

With its low weight and good acceleration, it is most definitely the fastest tyre in the last 400 metres.

- 22mm tread width, 170psi max. pressure
- Includes a nylon 'Safety System' puncture breaker for extra security

Sprinter Gatorskin

THE ROBUST SPRINTER, CREATED FOR EXTENDED RIDES AND TRAINING

Inheriting the best qualities of the highly popular Gatorskin road tyre, namely the durable carbon black tread mixture, the effective puncture protection breaker layer and the Duraskin anti-cut fabric.

The Sprinter Gatorskin itself features the typically comfortable and light feel of a tubular tyre. The professional riders use a similar combination in their tyres for Paris - Roubaix and other equipment destroying classics in the springtime.

If you want to 'get the miles in', but your streets aren't graced with the finest tarmac and you prefer the inconspicuous function of your tyres, then this is your tubular.

- The tub for 'getting the miles in'
- Tubular version of the popular Gatorskin clincher
- Available in 22mm & 25mm options
- Durable, all weather black carbon tread mixture

Giro

INEXPENSIVE TUBULAR TRAINING TYRES

Tubular tyres are used mainly in competitions because of their outstanding rolling qualities and their very good emergency operating features (riding whilst deflated). With the Giro, you don't have to renounce those qualities whilst practising. To offer you the tough, no frills Giro at a very reasonable price, we let this training tyre be manufactured in Asia to our specifications.

- Inexpensive training tubular
- Cotton construction, ribbed tread pattern
- Continental quality at a budget price

E-TYRES

SUITABLE FOR E-BIKES

For our E-Bike tyres, we fall back on over 100 years' experience with moped and motorcycle tires. All of our urban/tour tyres are rated to a standard speed of at least 25 km/h. Those tyres marked e50 are also certified for S-Pedelecs. With their high quality structure, puncture protection is high and the rolling resistance is low offering protection from premature wear brought about by the additional driving force.

TUBES

With the ContiTube program, you can find the inner tube most suited to your needs. Depending on your tyre dimensions and purpose, different sizes, types, valve types and widths are available.

All

The all-rounder for day to day demands. Available in all usual dimensions.

Light

Perceptible optimization of weight and rolling resistance due to thinner material. ! Light tubes generally require more frequent reinflating.

Hermetic Plus

The all-round carefree product. Designed for the most comprehensive puncture protection and air retention due to enhanced butyl content and increased wall thickness.

Freeride

Extra strong and increased volume. Effectively protects against punctures thanks to thicker material.

ACCESSORIES

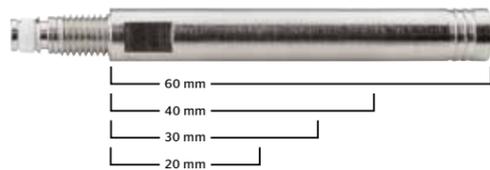

VALVE EXTENDERS

We offer a valve extension for every type of rim. What is required is a tube with a Presta valve which has an interchangeable insert.

With the enclosed tool you can easily fit the valve extension yourself.

TECHNIC

BlackChili Compound

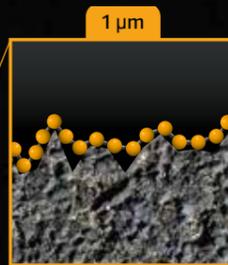

IT'S ALL ABOUT HOW YOU MIX IT

The rolling properties of the rubber compound of a tyre are primarily determined by three interacting factors - stiction [grip], rolling resistance and mileage [longevity]. The dilemma: If you improve any of these factors it can have a detrimental effect on at least one of the others. A tyre with maximum grip wears quicker and rolls more slowly. If you then make a tyre roll faster and more durable, grip, in turn, is reduced.

With our BlackChili Compound, a tread compound which is always based on the latest knowledge of polymers and raw material research, we have supplied the cycling industry with an enduring solution.

Depending on the application of a tyre, we adjust the compound formulation for the specific discipline - for road, gravel or mountain biking, time trialling or downhill racing.

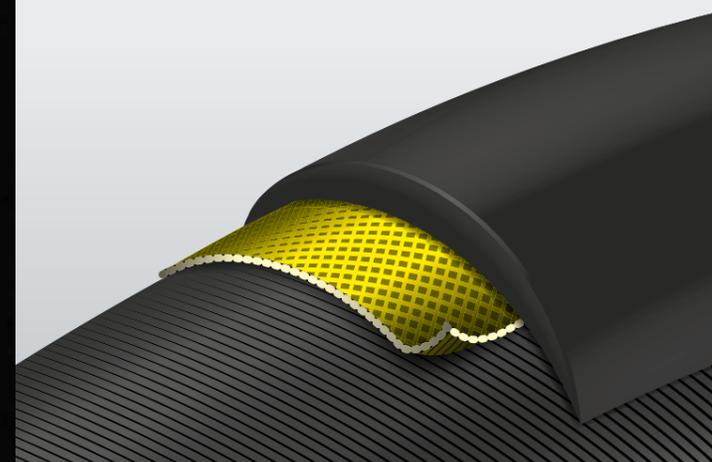

How does that work? For BlackChili, we refine special synthetic rubbers with proven natural rubber to high-performance tread mixtures. To these mixtures we then add soot particles, which in turn are optimised in shape and surface properties. The complex compound technology is so sensitive that tyres with BlackChili Compound are produced exclusively in our German Korbach plant.

12% better rolling resistance*

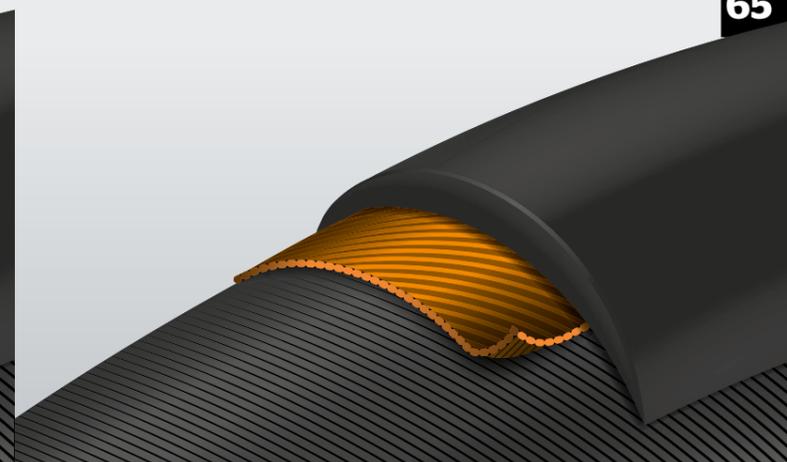

thanks to our improved BlackChili compound

*compared to our former Grand Prix 4000S II

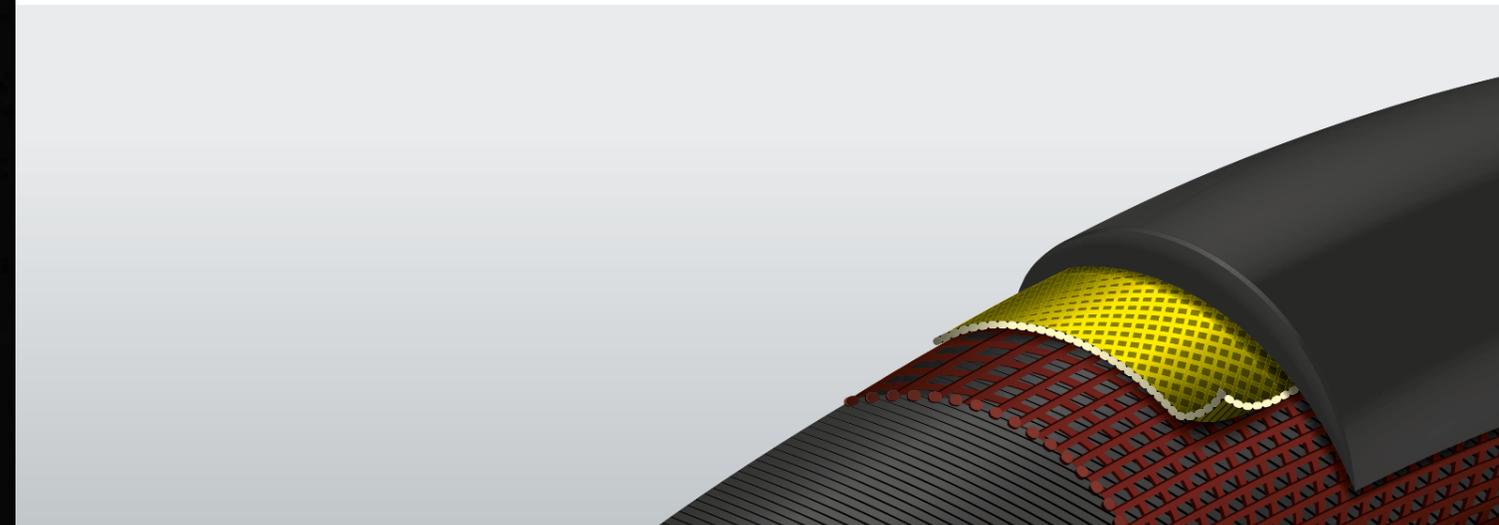

PolyX Breaker™ CUT AND PUNCTURE PROOF

With PolyX Breaker™ car expertise comes to the bicycle tyre sector. Polyester has been used successfully for years in car tyres and has proved extremely effective. The extremely resistant polyester fibre is woven tightly crosswise. A very high fabric density is achieved which makes the breaker resistant not only to foreign bodies, but especially to punctures. The rolling resistance is not affected by this breaker.

NyTech Breaker LIGHT AND SLEEK

The Nytech Breaker is based on the technology of our SafetySystem puncture protection. Made of nylon fibre and similar to Kevlar, it reliably protects against punctures and cuts. It also has particularly low rolling resistance and reduced weight, perfect for our performance range of road tyres.

PureGrip Compound PURE GRIP FOR EVERYONE

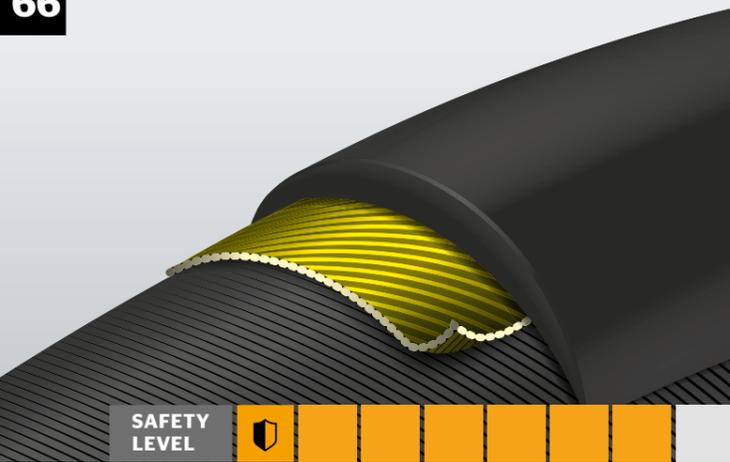

PureGrip Compound is derived from an activated Silica compound and is a good example of how we integrate customer feedback continuously into our research and development. This mixture technology fits in perfectly alongside the BlackChili Compound. The name PureGrip does exactly what it says; exceptionally good grip and durability are the distinguishing features of this compound. Engineered with PureGrip in our Performance products in our road, gravel and mountain bike ranges.

Hardshell ProTection MORE IS WHAT YOU GET

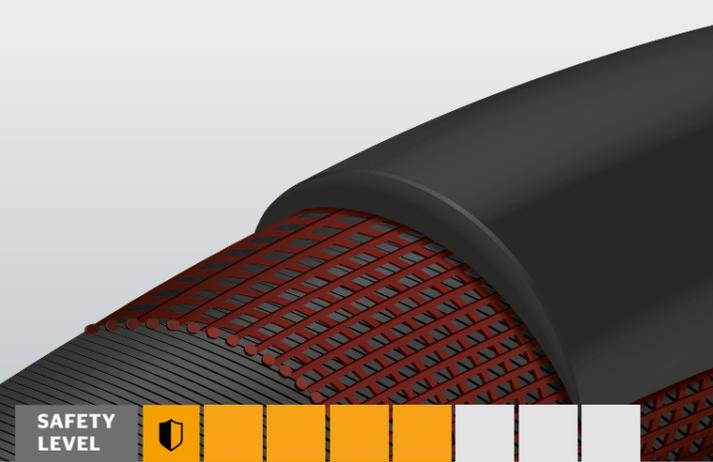

Puncture protection and mileage are the strengths of Hardshell-ProTection. A wider PolyX Breaker™, the specialist against punctures, under the tread centre and shoulders provides for great reliability. The three-ply - each layer with 60 TPI - carcass covers the entire tyre and makes it a real bastion against urban detritus. The outer sidewalls of the tire are reinforced with DuraSkin® fabric providing even more reliability due to the casing being so well protected. Hardshell tyres are the puncture-resistant flagship amongst racing tyres - produced exclusively in Germany.

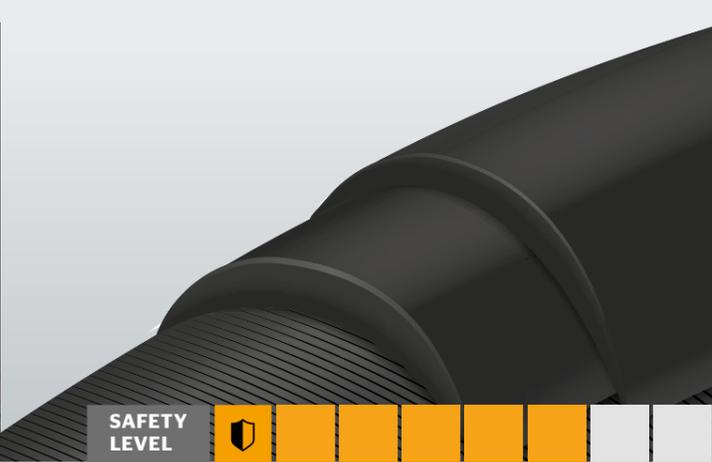

Vectran™ Breaker
PUNCTURE PROTECTION AT IT'S BEST

Vectran™ is spun from liquid crystal-polymer. This way a thermoplastic, multiple-thread yarn is created. As a comparison: This partially crystalline fabric is more cut-resistant than aramide and its tensile strength is five times higher than that of steel. A Vectran™ Breaker is lighter, more flexible and effective against cuts than a comparable nylon breaker. Without effecting rolling resistance.

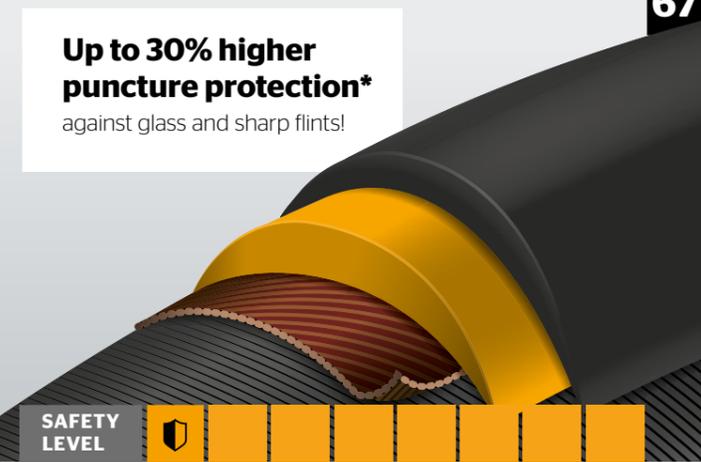

DuraSkin®
FOR HARD CASES

Tyres with DuraSkin® sidewall protection can take a beating as they are designed for the most adverse conditions. In rough terrain on a cyclocross or a gravel bike, on commuter bikes where tyres scrape along curbs, on touring bikes as they cross continents encountering many different road qualities and on the race circuit where they prove themselves in endurance events such as the Paris-Roubaix. The high-quality polyamide fabric reliably protects the wall of the tyre. Tyres with DuraSkin® can be identified by the characteristic brown mesh sidewall*.

Puncture ProTecton
THE NAME SPEAKS FOR ITSELF

An impeccable rubber Breaker, created for the daily ride on your Urban/Tour bike. The breaker ensures a high level of puncture protection and sidewall abrasion.

Up to 30% higher puncture protection*
 against glass and sharp flints!

SafetyPlus Breaker
THE ANTI-PUNCTURE SPECIALIST

Specially designed for e-bikes up to 50 km/h, we have combined our SafetySystem Breaker with a highly flexible natural rubber. The result is an extremely cut and puncture resistant breaker ply which has a low rolling resistance thanks to its high elasticity. This helps saving battery life and the environment. High acceleration torques and fast speeds in turns are easily absorbed by the breaker. The specialist for fast e-bikes and rental bikes.

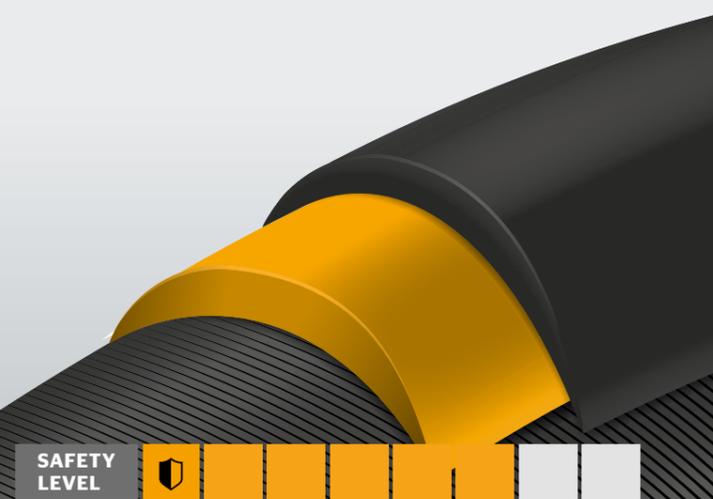

* Benchmark test: Piercing (blade) test measuring force required, Zedler Institute, 2016 - further details of the test: www.continental-tires.com/bicycle/technology

SafetyPro Breaker
LIGHTWEIGHT PUNCTURE PROTECTION

The new SafetyPro Breaker designed from nylon textile. Cross-woven textile fiber netting that is simultaneously robust and flexible. Maximum puncture protection with minimal added weight. The risk of punctures resulting from glass or sharp stones is substantially reduced.

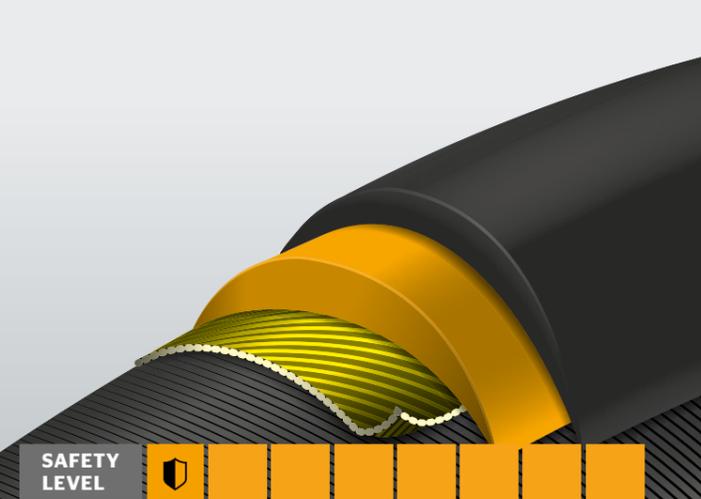

EXTRA PunctureBelt
CAREFREE ON A DAILY BASIS

Anyone looking for a reliable everyday companion will go for a tyre with EXTRA PunctureBelt. This rugged rubber breaker, combined with the rubber-reinforced sidewalls of the tyre, ensures a high level of puncture protection and sidewall abrasion. Where durability is the main focus, there is also a solid tyre version.

SafetySystem Breaker
PUNCTURE PROTECTION AS A SYSTEM

The SafetySystem Breaker consists of a Kevlar-reinforced, high-strength nylon fabric. Puncture and cut resistant, whilst also being light and flexible, allowing the tire to adapt more effectively to the terrain. The breaker protects the carcass against foreign objects and contributes to a longer lifespan of the tyre without significantly increasing weight or rolling resistance. Additionally, tyres with SafetySystem have particularly comfortable handling characteristics.

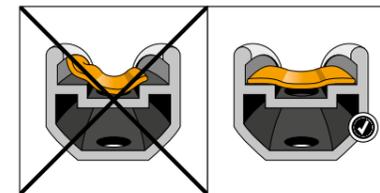

SafetyPlus Pro Breaker
THE SPECIALIST FOR E-BIKES AND CARGO BIKES

Engineered for the unique demands of modern e-bikes and cargo bikes up to 50km/h. Our Safety Plus Pro Breaker technology combines highly flexible rubber with the proven strength of our tightly woven PolyX puncture-resistant fibers. The high elasticity keeps rolling resistance low, prolonging the e-bike battery life so you get more miles from each charge. When riding with heavy loads, the SafetyPlus Pro Breaker contributes to confident handling through busy traffic and sharp corners, no matter the conditions.

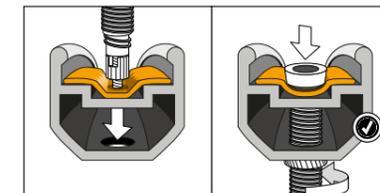

TECH SUPPORT

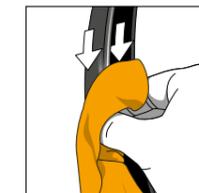

Mounting instruction Tubeless Ready tyres

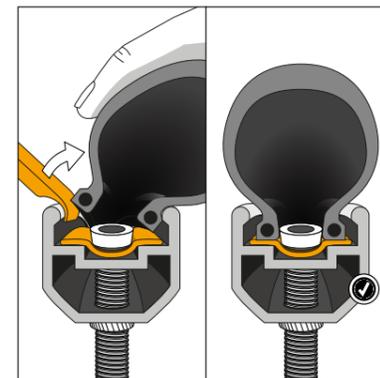

1 Check both rim and rim tape. Only use Tubeless ready rims. Ensure that the rim tape covers the rim well with at least two layers.

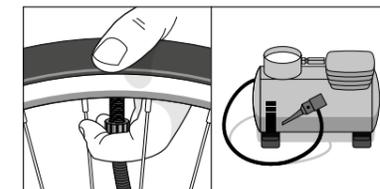

2 Mount the Tubeless valve first. Install it from the inside of the rim and tighten the nut. Press your finger on the rubber end of the valve to secure a better fit. Only tighten the nut by hand, do not use any tools.

3 Before the initial inflation you can apply some soapy-water or a mounting pad on the contact points between tyre and rim bed. This can help improve mounting the tyre on the rim.

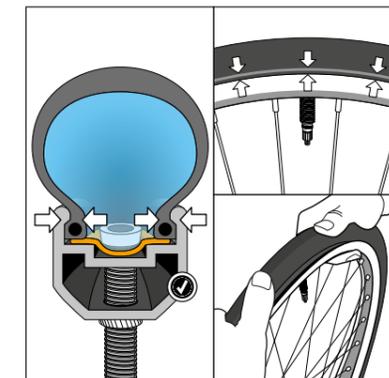

4 Mount the Tubeless tyre on the rim in correct orientation of rotation. Ensure no loose pieces (e.g. sand, plastics) are found inside. Due to the tighter dimension tolerances of a tubeless tyre compared to a normal clincher tyre, it may be helpful to use tyre levers.

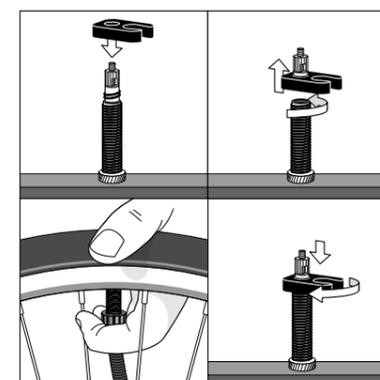

5 To fit the tyre between the hooks, you may need a higher amount of air in the first instance. If you are using a floor pump, it is better to maintain a constant momentum within the first few seconds. A modern floor pump with a second inflatable cartridge can help to achieve this.

If a floor pump does not fill and accurately seat the tyre, a compressor could help. You may need to adapt to the respective bicycle valve.

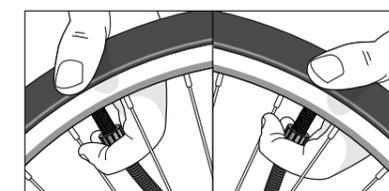

6 The correct fitting of the tyre on the rim is mostly notable by a loud clicking noise. Check the air tightness of your Tubeless system. Does it lose any air? Check if the control line has an equal distance to the rim. If not release some air and work on the tyre with both hands.

7 To enhance the air volume, unscrew the valve core. Pump it up and screw the valve core in again.

8 For the best puncture resistance, we recommend to fill approximately 30 - 60 ml of tyre sealant through the valve. Considering it will dry over time, it is best to check and refill it every 3 - 6 months.

9 If you are using tyre sealant: For inflation place the tyre with the valve at the 11 or 1 o'clock position. Otherwise sealant could leak into the valve or put too much turbulence into it. It could dry faster or lock up the valve core.

Please be advised that the use of a CO2 cartridge can clump the sealant particles.

TIPS AND TRICKS

In individual cases where the tyre bead does not properly sit on the inside of the rim, try unscrewing the valve nut and pushing the valve back.

Valves with a round rubber end have a lower volume than those with a rectangular rubber end. Maybe you could try to change your existing valve to fit your tyre accordingly.

WATCH THE VIDEO

RECOMMENDED AMOUNTS OF SEALANT PER TYRE

ROAD	Dimension	Filling amount
	25 mm	30 - 60 ml
	28 mm	60 - 90 ml

MTB	Dimension	Filling amount
	2.0 - 2.1	80 - 100 ml
	2.2 - 2.3	100 - 120 ml
	2.4 - 2.5	120 - 150 ml
	2.6 - 2.8	150 - 180 ml

Important:

Do not insert the tyre sealant with the valve at a 6 o'clock position! The valve should be located at the 5 or 7 o'clock position.
